I’m Bob.Frankston on Facebook. Note that I usually post publicly, so there isn’t a strong need to friend me. So, I apologize in advance for my backlog of requests I haven’t responded to. Typically, nothing personal – just one more thing to think about.

Note that I list more polished posts and my columns as “Further Reading”.

It’s easier to post simple thoughts on Facebook than to create a formal posting. Eventually, I hope to consolidate these thoughts into formal essays. In the meantime, I’m providing a list of Facebook posts that might be of interest to others. Please forgive the typos and consider them mulls-in-progress.

Facebook does have the advantage of providing an opportunity for a conversation – something I haven’t implemented on my site.

I’ve done very little posting on Quora but plan to list any new postings here.

I’ll attempt to list these in reverse chronological order, and, at times, any summary may be longer than the original post. I’m going to try to use * or † for posts I do want to follow up on in a longer essay or a column. But probably won’t bother.

#Gripes
1. Long DHCP leases are evil.
2. WiFi disconnectivity.
   a. Social media as an opiate.
   b. Community Forums are not a substitute for support.
5. Messages that don’t provide enough info. Like a hex address instead of a device description.

Gripes in progress
Windows File Explorer
⇒ So much potential
   o View by attributes (but only some)
   o Thumbnail manipulation
   o Illusion for Windows
⇒ Windows 95 compatibility
   o Hard to write managed extensions
⇒ Legacy of WinCE file transfer protocol
⇒ Lack of PaperPort capabilities
⇒ Vs. Internet Explorer
⇒ Failure to embrace the metaphor
   o OneDrive online
   o OneNote tec.
⇒ Perhaps for file system extensions
⇒ RemoteApp

#Fails
I’m going to start to use the tag #Fail for some posts. Partially to avoid having too many marked #gripe but also to be about more specific encounters.

1. Lyft (and Uber) fail.
2. UA record splitting.
3. Uber stuck at SFO.
4. Tizen/Eclipse installation. (~vm\(nl\)c:\Program Files\Java\jdk1.8.0_161\bin)
5. Hulu and Netflix #fails on Roku.
6. Passwords on guest WiFi connectivity.
7. Canadian Rail tiny popup.

8. Printing tiled images should default to single-sided.
9. Bitrot as sites start to require security and other corporate practices.
10. Uconnect, Sirius and …
11. HVAC Unmonitored

Software, Programming and Disconnectivity
To a degree the concepts behind software pervade my writings so this isn’t a distinct category, but I’ll attempt to group some of the appropriate writings here.

⇒ JerryScript – a very small JavaScript engine.
⇒ Connectivity as a Vital Consumer Service.
⇒ The risks of As a Service and cloud dependency.
⇒ Complexity of Firewalls! Etc.
⇒ IoT ET al are not ready for prime time.
⇒ Getting SQL server working with TCP. (w/LINQ pointer)

Strawman
An informal fallacy based on misrepresentation of an opponent’s position. To “attack a straw man” is to create the illusion of having refuted a proposition by substituting a superficially similar yet weaker proposition and refuting it, without ever having actually refuted the original position.
